CAREER SUMMARY

Results-driven React Frontend Developer with 4 years of experience in designing and developing robust, user-friendly web applications using React.js and Next.js. Experienced in integrating APIs, LLM-powered features, using AI coding tools, building scalable component architectures with a track record of delivering high-quality code aligned with best practices. Looking for a challenging role to build scalable and efficient user experiences and to explore innovative technologies in a dynamic team environment.

EXPERTISE

Responsive Web Development • Performance Optimization & Code Splitting • Scalable Frontend Architecture • LLM API Integration & AI-powered Features • State Management & Data Flow • UI Implementation from Figma / Design Spec • Version Control & Collaboration

TECHNICAL SKILLS

React.js • Next.js • Javascript • Redux • Context API • Material UI • Tailwind CSS • Git/ Github • Agile/ Scrum • API Integration • Azure Devops

PROFESSIONAL EXPERIENCE

Software Engineer – Frontend Developer | Planetcast Media Services Limited | Noida, India **Feb 2025 – Present**

- Key role in developing and maintaining Contido, a cloud-native Media Asset Management platform streamlining media supply chain and production workflows.
- Contributed in integrating Gemini 2.5 Pro to build an AI-powered semantic tag generation feature for video assets, reducing the manual effort of adding context-aware tags.
- Responsible for developing production-ready features using React.js and Next.js with a scalable, reusable component architecture.
- Leveraged GitHub Copilot to decrease development time, improving code throughput and reducing boilerplate across the codebase.
- Implemented workflow-driven interfaces using React Flow, allowing users to design and configure complex product workflows with custom interactive nodes.
- Migrated the frontend build system to Webpack 5 and implemented Microfrontend Architecture using Module Federation, achieving 20% faster builds and independent deployments for 2 modules.
- Participated in code reviews to ensure code quality, logic optimization, and best practices, resulting in a 25% decrease in code errors.

Frontend Developer (Cloud Engineer II) | Insight | Gurugram, India **Jul 2022 – Feb 2025**

- Built and maintained frontend applications, improving performance using modern web practices and caching strategies.
- Created complex, interactive data visualizations using Chart.js for user-focused analytics interfaces.
- Maintained high code quality through authentication implementation, code reviews, and logic optimization.
- Participated in all Agile development processes and utilized Azure DevOps to ensure smooth feature delivery.

EDUCATION

B.Tech in Information Technology | KIIT Deemed University, Bhubaneswar, Odisha **2018 – 2022**

CERTIFICATIONS

Microsoft Azure Developer Associate (AZ-204) • AWS Certified Cloud Practitioner (CLF-C02)
